

# Why Masks Are Actually Awesome

Masks are here to stay, even after you get vaccinated. Masks are about showing others that you respect them and want them to be safe. Masks don't substitute things like hand washing for 20 seconds and avoiding close contact, which are still very important to prevent getting and spreading COVID-19.

But there are other reasons that masks are worth wearing!

- Masks are an accessory to your outfits; get creative!
- Masks have been a global fashion trend long before COVID-19 came around.
- Wearing a mask doesn't just make you look like a superhero; it actually does make you a hero.
- Nervous giggler? Bite your lip when you are worried? With a mask no one will know!
- Don't feel like getting ready in the morning? Toss on a mask and you got more than half your face already covered!
- Walking around with only a sliver of your face showing is exhilarating. It's like being incognito. To go even more undercover, consider making/buying a face shield.
